

Sistema KOBE 60

DISPENSER SYSTEM || ELECTRIC SUPPLY

Practical and functional.

The ideal solution for restaurants and bars, but also for communities.

Equipped with a complete system for micro filtration with 0.5 micron composite filter (micro filter membrane + silver activated carbon) and RAPID SYSTEM connection; compartment for CO2 cylinder up to 10 kg; analog meter; water pressure reducer, UVC Led lamp and UVC Led system near the dispensing points to protect the system from bacterial retro-contamination phenomena. Inside there is the ICE 40 model under counter combined with the dispensing column positioned on the top.

The new TRIS electric column is equipped with three taps capable of delivering 2 types of water at the same time. On the top there is also a display for consulting the status of the machine, type of water supplied. The drip tray can be connected directly to the drain.

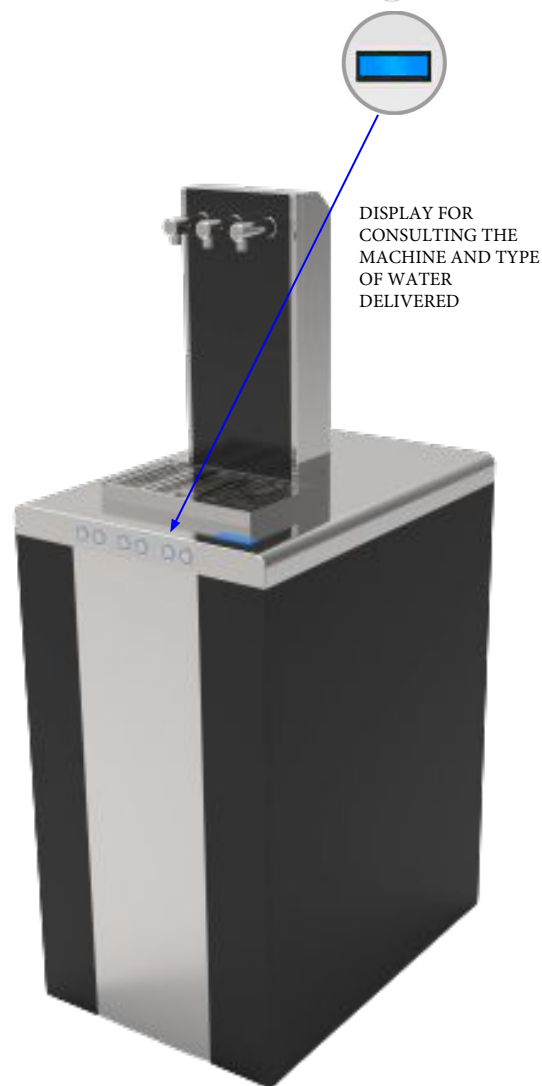

The buttons for dispensing are positioned on the front edge of the top. Up to 6 independent payments can be managed.

The Kobe 60 system is equipped with feet as standard.

COLOR COMBINATION:

TOP: INOX

CAPE: BLACK

DISPLAY FOR CONSULTING THE MACHINE AND TYPE OF WATER DELIVERED
