

EUROS 150

COLUMN WATER COOLER

The sustainable proposal of MAXIMUM WATER: quality, practicality and comfort available to everyone.

Free standing transportable system for supplying mains water.

Euros 150 produces about 150 l / h of chilled water in three different deliveries (still room, still chilled and sparkling chilled) and this column dispenser is equipped with:

- vandal-proof buttons;
- volumetric pre-dosing system: allows you to program the desired dispensing dose.

It is equipped with a complete microfiltration system with activated carbon filters and RAPID SYSTEM connection, compartment for 4 and 10 kg CO2 cylinder, LCD display, stainless steel body and safety lock. The water cooler is equipped with handles, feet and wheels for transport.

It uses a latest generation system which combines the innovative technology of LED light with the germicidal power of UV-C emission.

The UV LED lamp is positioned inside while the UV system at the point of use, avoiding back-contamination.

EUROS 150

COLUMN WATER COOLER

PRODUCT LINE FEATURES:

Body material: Aisi 430 stainless steel
Water supply pressure: 2-3.5 ° bar
Operating ambient temperature: 10-35 °
Supply water temperature (min-max): 10-25 ° C
Power supply: 220v - 50 Hz single phase
Installed power Max 460W
On / off switch

TECHNICAL FEATURES:

DISPENSER || EUROS 150

Productivity: 150 l/h
Weight: 70 kg
Dimensions (LXWXH): 50X40X165 cm
Cooling: Ice bank
Compressor Hp: 1/4 " Hp
Ice bank tank: 22 l
Ice bank capacity: 11,5 Kg
Carbonated liters: 2 l
Carbonator power: 200 l/h
Recirculation pump: PRESENT
Power consumption: 460 W

USABLE WITH A FILTER WATER CARE FILTERS.

EQUIPMENT COMPLIES WITH:
D.M. 25/2012 - D.M. 174/2004

USABLE ONLY WITH DRINKING WATER
